

PROVIDING A HELPING HAND TO ALLOW MORE
TIME TO FOCUS ON WHAT YOU DO BEST

WHAT IS THE KONVERGENT ZONE

In the Pacific Northwest there is a phenomenon called a convergence zone. This is created when two separate storm systems collide. In this zone the weather becomes unstable. When making the transition to CET Designer, turbulent situations can occur as different softwares collide. Konvergent Solutions helps to ease the transition by personally assisting furniture dealers and manufacturers with the correct tools necessary to help them work more effectively and efficiently. By giving designers the correct tools earlier in the process, this allows them to be more creative and gives them an advantage during and after transition.

CASE STUDY

A large Furniture Dealer with 5 locations nationwide spent apx 95K on new hardware, licenses, and training for 30 designers.

Interviews were conducted a month and half after training.

90% of the group had not opened the program at all since training. This was due to lack of time and tools needed to operate. This resulted in having to retrain designers. All the while, software licenses sat unused.

Designers have busy schedules, After training they lack the time required to apply their learned knowledge to create the foundation required to use CET Designer effectively.

- ◆ Special Library Creation
- ◆ Static Renderings
- ◆ Virtual Reality Experiences
- ◆ Video Walk-throughs
- ◆ Spaceplanning & Specifications

PROVIDING SHELTER FROM THE RAIN OF CHANGE

CUSTOM TITLE BLOCKS

One of Konvergent's most popular services is the title blocks package. After returning from training designer's do not have the time necessary to create title blocks that allow them produce drawings and export in a format that customers and installers are used to seeing.

What's included?

- Full set of 12 standard size Title Blocks
- Manufacturer specific Viewport Settings for easy to create install drawing * Manufacturer specific
- Customized How To Guide for using and installing items
- Various helpful CET Favorite reusable files and disclaimers for standardized layouts

Data package is delivered via a shared Dropbox folder. Files include CET Reusable file formats, pdfs, and the master CET Designer drawing file used to create them.

Once package is approved turnaround time for completion is 1-2 weeks.

The background of the image features three incandescent light bulbs hanging from black cords. The bulbs are arranged in a slightly diagonal line from top-left to bottom-right. The entire image has a dark green, semi-transparent overlay, which makes the text stand out. The text is in a white, hand-drawn, sans-serif font.

ALL KONVERGENT SERVICES INCLUDE:

FREE ONE-HOUR Q&A WEBINAR

CUSTOMIZED HOW-TO GUIDE(S)

DIGITAL ITEMS DELIVERED THROUGH DROPBOX

PROVIDING A HELPING HAND TO ALLOW MORE TIME TO FOCUS ON WHAT YOU DO BEST

Designers have busy schedules. After returning from training, they lack the time and tools to begin using CET Designer effectively.

The **Designer Toolkit** provides them with the items needed to adopt CET Designer with less effort resulting in successful acceptance.

When quicker adoption rates are achieved, there is increased return on investment, ability to produce and convert more projects quicker, and an ability to compete against similarly created RFP responses.

TOOLKIT CONTENTS

TOOLKIT AND HOW TO USE IT

GETTING STARTED

Installing CET or setting up a new user? These items will help you get started and familiarize yourself with the CET landscape.

BEST PRACTICES

After set up these items include tips and tricks as well as a quick desktop guide to keep at your fingertips. These items will assist you as you become comfortable with the program.

REUSABLE FILES

These files are the backbone of CET Designer. Using these items make using the program efficient and effective.

START HERE. Before installing CET Designer the following items offer information on how to install and set up your computer to maximize efficiency. The Getting Started Guide also offers additional information about Configura and CET Designer services available.

GETTING STARTED

INSTALLATION GUIDE

Best practices for installation: How to be a License Administrator and using My Configura to your advantage.

CET SETUP

After the program is installed, this guide offers instructions on how to set up items, such as, the Control Panel, what Defaults are best to set, and how to maximize efficiency when printing your projects by setting up Report Settings.

ONBOARDING CHECKLIST

If you are a new designer that has not received training, or you have just returned from training, this checklist will make sure you are headed in the right direction.

BEST PRACTICES

DESKTOP GUIDE

A handy printable guide for new users to print and keep nearby. It includes a keyboard with commonly used Key Bindings, a Command Glossary, list of Reusable File Types and much more.

TIPS & TRICKS

A collection of time saving tips and tricks that CET power users utilize to increase efficiency and produce quality projects.

GENERIC OFFICE DRAWING

Perfect for designers under a tight timeline. This drawing offers a pre-lit fully constructed office with multiple office types that typicals can be easily dropped into. A designer can easily personalize this office with a client's finishes and logos to create exquisite renderings without having to build an office from the ground up.

REUSABLE FILES

Reusable Files are the backbone of CET Designer. If used often they can maximize the true potential of PGC design.

FOLDER STRUCTURE

This is a .zip file that includes folders for all of the CET Designer Reusable File types. This structure is meant to be copy and pasted on your local computer or office network to establish a standard saving structure.

REUSABLE FILES INCLUDED

- Complete set of Generic Titleblocks (Vertical and Horizontal)
 - Calculation View Settings (3)
 - Styles
 - Line (3)
 - Text (3)
 - Dimension (3)
 - Photo Lab Custom Presets
 - Close Focus
 - Sketchup Style
 - Paper View Viewport Settings
 - Panel*
 - Electrical*
 - Component*
- *Manufacturer specific
